

YTD revenue
on target, but a
July miss and
concentration
risks need
action

Revenue Jan–Sep: **\$55.1M, exactly on target (0.0%)**. The total hides gaps.

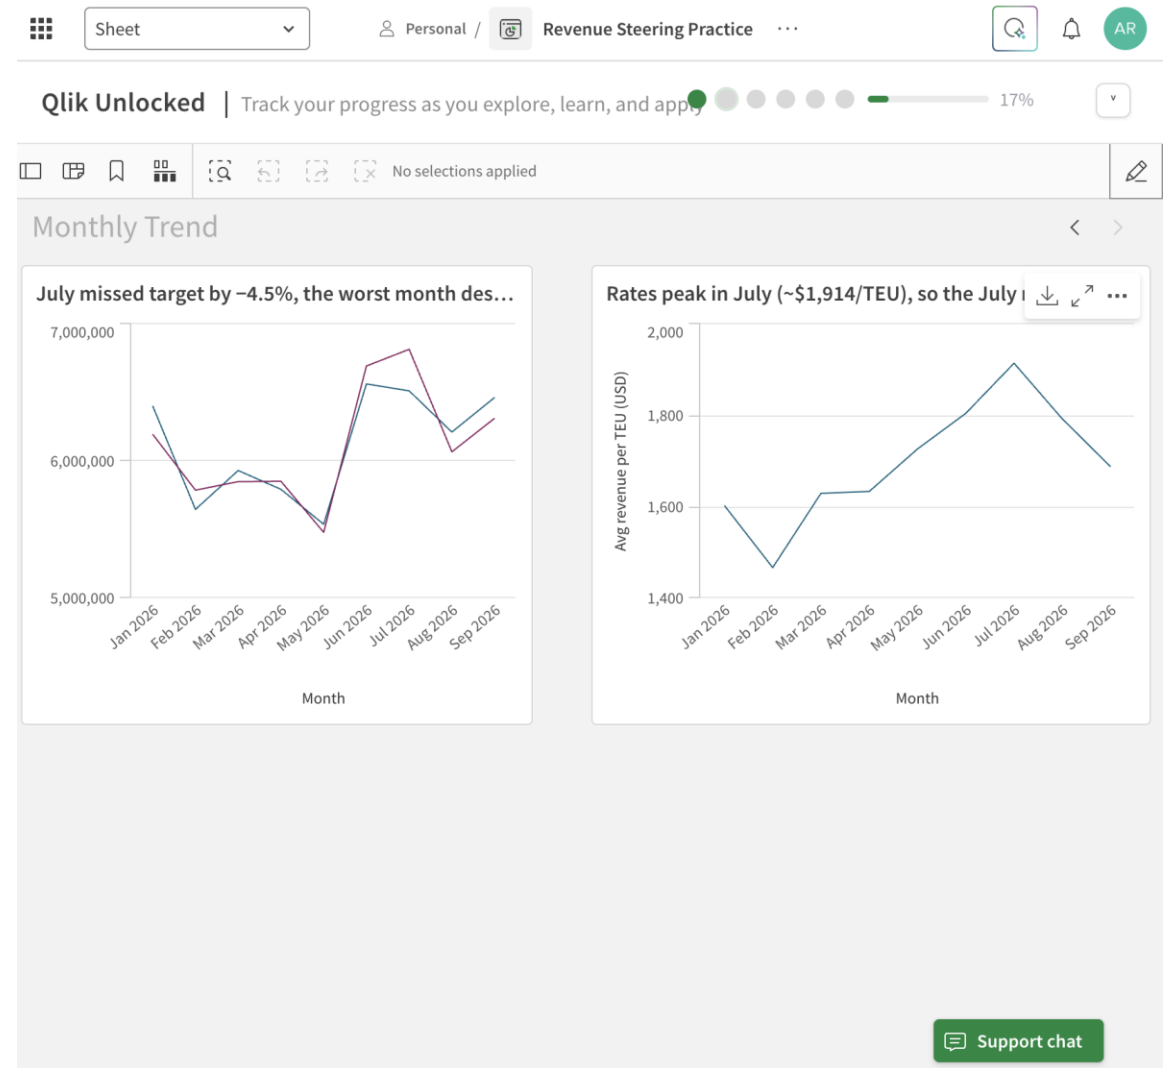

July missed by –4.5% (–\$310k) in peak season. Transatlantic was –8%, despite being the best lane YTD (+2.1%).

Top 4 customers = 60% of revenue; 3 of them are reefer-heavy.

New quotation tool: **84% adoption**. LatAm (64%) and the Middle East (70%) lag behind.

July shortfall was a volume problem: rates peaked, but too few containers

- Rates were highest in July (~\$1,914/TEU), so pricing was not the issue
- Action: review Transatlantic July capacity and bookings with the lane team

Protect key reefer accounts; close the tool gap in LatAm and the Middle East

- Key-account reviews for Kestrel, Fjord and Alpenfrost (≈85% of reefer revenue)
- Training for ~15 reps in LatAm + the Middle East to reach >90% adoption
- Monthly tracking of both in this dashboard
